

"In Tampere, the TykeSkater® ice skate trainers are in heavy use and juniors from three different ice sport clubs learn to skate with them. The advantages include good adjustment possibilities, durability and the fact that we no longer have to use old stools as skating supports."

- Markku Mattila, CEO, Sentteri Tampere Oy

"As a single mom to a three-year-old boy, I was rather distressed about teaching him how to skate, especially since it had been years since I last skated and was certain I would not stay up on skates myself either. The TykeSkater® skate trainer offered the help we desperately needed. Now my boy gets to learn how to skate, and I don't have to worry about him or me falling down. The skate trainer is excellent assistant since I can also hold on to it myself and walk by my son guiding him forward."

- Reija, Rauma Finland

"We have been really happy with the TykeSkater® skate trainer. It has been used by both kindergarten and older special needs students, and has been widely praised. We chose the TykeSkater® precisely because it is also suitable for larger students and adults as well as for younger and smaller users. TykeSkater® allows several trainees to be guided at the same time."

- Juha Vouti, Special Exercise Coordinator, Kempele

"The assistant's handle on the elbow support handle is ideal for using the skate trainer with people with disabilities. This means that skating is possible also for both deaf and blind skaters. It is very easy to keep a skater upright and avoiding an anxious skater pulling a volunteer over. The skaters who have used it found it much easier to stand up and balance and it has reduced their anxiety and lack of confidence. Due to the safety and enthusiasm that the users have had with the TykeSkater®, other people with disabilities may find it easier to take up the sport."

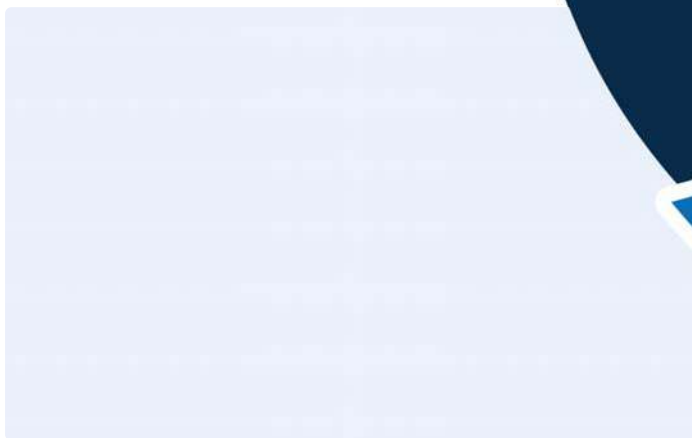

- Margarita Sweeney-Baird, Founder and Chairman of Inclusive Skating, UK

Moving forward
together!

TykeSkater® black / galvanized

Product number: 338000

TykeSkater® red / galvanized

Product number: 338000PU

TykeSkater® is meant for people learning to skate. In addition to private use, its sturdiness and wide adjustment range make it also highly suitable for professional use. It can also be used on synthetic ice.

TykeSkater® enables the user to learn how to skate in the right posture. The shape of the product gives the user's feet plenty of room to kick and the feet won't hit the support while skating.

It can be height-adjusted without tools to fit users from kids to grown-ups. Height adjustment, assembly and folding is done without tools.

The round frame helps the support slide better. Since it is foldable, it is easy to transport and store.

Specifications:

Product weight: 6 kg / 13 lbs

Max. user weight: 100 kg / 220 lbs

Height adjustment: 68-100 cm / 26,8"-39,3"

Product measurements with handlebar at its lowest (W*D*H):

Open frame:

98,5 cm x 74 cm x 68 cm /

38.8" x 29.1" x 26.8"

Folded frame:

98,5 cm x 77 cm x 10 cm /

38.8" x 30.3" x 4"

Wheel set for inline skating

Available as an accessory

Product number: V338000R

The accessory wheel package, which can be installed to the basic ice skate trainer model, makes it possible to get the same support also when inline skating.

This makes TykeSkater® an even more versatile assistant for both winter- and summertime fun on skates!

Made in Finland

TykeSkater® black / galvanized with elbow supports

Product number: 338000KY

TykeSkater® red/ galvanized with elbow supports

Product number: 338000PUKY

The handlebar with elbow supports offers extra stability for those users who need it. Changing from the regular handlebar to the elbow-support model is fast and easy. Distance and depth of the supports can be adjusted. The elbow support also has an assistant's handle for guiding, for example, a visually impaired person skating.

Specifications:

Product weight: 13 kg / 28.5 lbs

Max. user weight: 100 kg / 220 lbs

Height adjustment: 86-120 cm / 33,9"-47,2" (from the upper surface of the armrest to the ground)

Delivery in 2 separate packages

[Also sold as a separate accessory](#)
